### **Abstract**

Related document: SOP204 Cultivation

The WIN Creation of a plant monograph has been developed to implement the first step “Preparation of cultivation materials” of the SOP Cultivation into practice. Scope of this WIN is the preparation of a plant monograph for further use according to baselines of the World Health Organisation (WHO) (Monographs on selected medicinal plants Vol 1 – 4). This includes knowledge about botanical and pharmacological characteristics, the good agricultural practices and quality control requirements for herbal materials.

As it can be seen in the attached flow chart, the WIN Creation of a plant monograph consists of 3 “Action” steps, where a process needs to be followed. In chapter 6 of the WIN the respective responsibilities and a detailed description of each process can be found.

## Flow chart
